Subject: RE: 91127-E

Jessica,

Attached, please find revised data matrices (Agency and Public versions) for 91127-E. The Excel spreadsheet is also attached. As I mentioned on the phone, Nippon submitted new data 6-7 months after this application was submitted. The data gaps have now been replaced with newly cited data. All of the MRIDs were checked and we found one error, which was corrected. If you have any questions, please contact me. Thanks!

Ann

Subject: 91127-E

Hello Ann,

I just left a voicemail but I wanted to give you a few more details. The technical acetamiprid's data matrix that you are registering has some issues. If you could address these by Friday I would greatly appreciate it.

1. You have written “gap” on several guidelines. The primary data owner does not have gaps in its data as of now therefore any time gap is written it needs to be replaced with “pay” or however you all intend on addressing the gap.
2. Missing guidelines
 - a. 850.1020
 - b. 141-5
 - c. 141-1
 - d. 72-2
 - e. 875.2100 (cotton)
 - f. 835.1240
3. MRID typos—verify that all the MRID’s you listed to fulfill data requirements are correct
4. Reorganize the data matrix by area (product chem, acute tox, etc.) then by guideline number.
5. Please send me a copy of the data matrix in PDF and excel. The excel version will be helpful to me in order to sort and make notes. The PDF version is required.

Thank you for your time.
